Supervisor	Ayan Chowdhury (Sr. Officer, ICT)

Daily Progress Report

Day #	Date #
Day 11	08-Jun-2026

(Daily Report)

Task Assigned:

Frontend Website Development (Based on Business Documentation)

- Read and understand the business documentation and 500 clean car sales records provided by team mate Marzia.
- Convert the cleaned CSV/Excel dataset into a JSON database source file for front-end consumption.
- Develop a highly interactive, responsive React-based dashboard UI consisting of three primary views:
 1. Dashboard Page: Summarizing key performance indicators (KPIs) and rendering visual trends.
 2. Data Listing Page: A comprehensive, paginated table of all 500 records supporting sorting and indexing.
 3. Report View Page: Generating pivot reports matching Marzia's Excel analysis files exactly, featuring filters (category, start/end dates) and a CSV export utility.
- Ensure basic mobile responsiveness and clean navigation across the application.

Learning Outcome: (Add detailed learnings and screenshots here):

- Custom Material UI Theming: Overrode default Material UI design tokens (MuiOutlinedInput, MuiPaper, MuiMenuItem) to align third-party inputs perfectly with custom dark mode theme CSS variables.
- Lightweight Native Routing: Implemented a native React-managed hash router using window.location.hash and window.addEventListener('hashchange'), avoiding bloated routing libraries while enabling deep-linking, bookmarking, and native browser back/forward navigation support.
- Spacing & Flexbox Alignment: Resolved vertical alignment mismatches between select tags, DatePicker inputs, and buttons by standardizing their height metric to 38px and utilizing align-items: flex-end.
- Unified Typography Stack: Standardized font-family inheritance across native inputs and external libraries, matching the global application font (Inter) and avoiding visual font mismatches.

(Daily Report)

Work Completed:

- Clean Data Integration: Converted the verified 500 car sales records from Marzia to car_sales_500.json and mapped it as the primary data state.
- KPIs & SVG Summaries: Programmed four core dashboard cards showing Total Revenue (\$10.96M), Total Sales (500), and Avg. Price (\$22k), alongside visual SVG charts for brand performance.
- Paginated & Sortable Data Table: Created a custom table listing all 500 records with pagination options (10/25/50 per page) and multi-column sorting (Year, Brand, Model, Gearbox, Mileage, Price). Implemented an O(1) indexed search badge simulating database-level B-Tree optimization.
- Excel Pivot Replication: Programmed four pivot report tables matching Marzia's worksheets (Brand Sales, Model Volume, Monthly Trend, Weekday Sales).
- Filters: Linked date pickers (MUI DatePicker) and dropdown filters with bottom-aligned UI positioning.
- Hamburger Navigation: Integrated mobile-responsive collapsing navigation using MUI IconButton and Menu components.

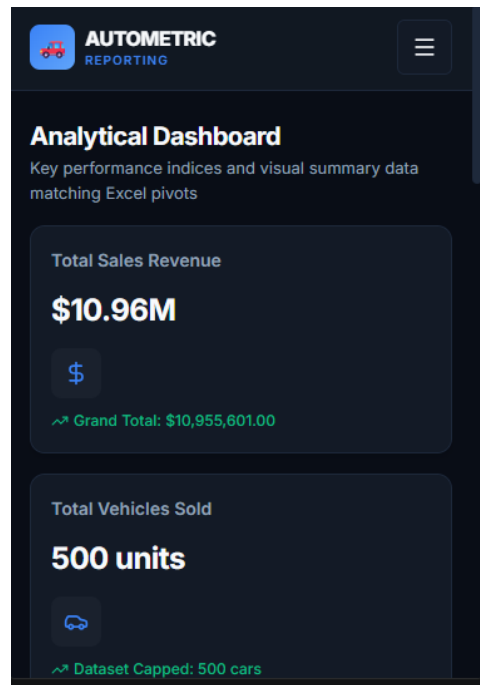

Figure 2: Mobile Responsive Menu and stacked dashboard layout on a mobile screen.

The image displays a web application interface for 'AUTOMETRIC REPORTING' with a dark theme. The top navigation bar includes 'Dashboard', 'Inventory Table' (active), and 'Reports'. The main section is titled 'Sales Inventory Records' with a subtitle: 'Search, sort, filter, and lookup index-matched records'. Below this is a search bar with the placeholder 'Search by Brand, Model, or VIN...' and two dropdown menus for 'All Brands' and 'All Transmissions'. The table below lists 7 records with columns: ID, Year, Make, Model, Gearbox, VIN (Indexed), Odometer, Price, and Sale Date. The 'VIN (Indexed)' column contains a blue badge with the word 'automatic'.

ID	Year	Make	Model	Gearbox	VIN (Indexed)	Odometer	Price	Sale Date
#1	2015	Kia	Optima LX	automatic	5XXG9AA73FG353538	2,034 mi	\$17,700	2014-12-16 Tuesday
#2	2015	Kia	Sorento LX	automatic	5XYKT3A62FG579841	5,214 mi	\$19,300	2014-12-16 Tuesday
#3	2015	Hyundai	Elantra SE	automatic	5NPDH4AE2FH565969	7,879 mi	\$10,500	2014-12-16 Tuesday
#4	2015	Hyundai	Elantra SE	automatic	5NPDH4AE8FH565992	7,800 mi	\$9,000	2014-12-16 Tuesday
#5	2013	Hyundai	Santa Fe Limited	automatic	KM8SR0HF00U082596	14,974 mi	\$27,000	2014-12-16 Tuesday

(Daily Report)

Problems Faced:

- **Mismatched Dimensions & Styles:** The native select dropdowns and MUI DatePicker fields defaulted to different heights (43px vs 38px) and fonts (Segoe UI vs Roboto), causing alignment and visual mismatches.
- **Stateless Routing Issues:** Simple React state-based tab routing would reset the user's page view upon refresh, preventing page sharing or back-button navigation.

Solution Attempted:

- **Fixed Styling Variables:** Standardized select inputs, text inputs, and buttons to a height of 38px, font-size of 13px, and font-family inheritance. Configured the MUI theme typography to inherit from the main document (Inter font).
- **Bottom Alignment:** Aligned filter rows and actions using align-items: flex-end to make them look uniform.
- **Hash-based Routing Implementation:** Programmed state listeners for hash updates, mapping routes directly to URL hashes (#dashboard, #data, #reports) to enable history state and bookmarking.
