

Frontend Website Development (Based on Business Documentation)

Objective

You will have to develop a simple React-based website UI based ONLY on the documentation provided by your team member.

Task1: 1. Read Documentation

Understand:

- Pages required
 - Features required
 - Layout structure
 - Fields for each page
-

2. Build Website UI

Create a React website with:

Dashboard Page

- KPI cards (from dummy data)
- Simple summary display

Data Listing Page

- Table view of car sales data
- Columns based on Excel dataset

Report View Page

- Simple chart display (optional static/dummy data)
-

3. UI Requirements

- Clean layout
- Responsive design (basic)
- Navigation menu
- Dummy data from Excel JSON conversion

OUTPUT REQUIRED

- Documentation (Word/PDF)
- Github Link.
- Screenshots of dashboard
